Cast Iron Columns and Lighting

We supply lamp-posts and columns to specialist suppliers, individual sites, local authorities and private clients throughout the UK. They prove popular where people are interested in providing a more sympathetic style of historic lighting or structural support. Cast iron is an excellent material for structural purposes with high compressive strengths per N/mm² offering a functional and visually appealing alternative to steel products.

Our range is broad and mixes fashionable new designs with more traditional ironwork. Columns are technically similar to make and are used for canopies, archways, walkways and entrances. We can cast anything from 1 metre to 10 metres depending on requirement. Our patterns take inspiration from traditional Roman, Doric and Corinthian designs and although we are always enthusiastic about the designs of the past, we regularly make modern design columns for clients throughout the world.

We are currently in the process of updating our catalogue with over 100 cast iron columns, but please get in touch in the meantime with any enquiry you may have.

All castings are hand-made to order using traditional foundry methods and can be produced in grey iron, ductile iron or in aluminium.

Purchasing Guide

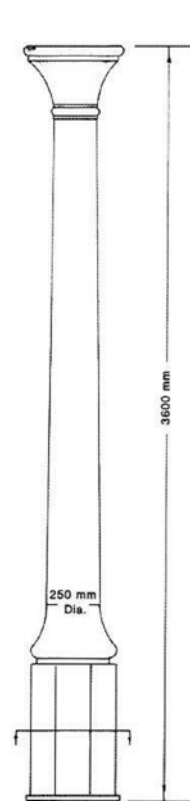

- We would usually recommend using ductile iron for our larger columns and lighting products.
- All lighting columns and lamp-posts are supplied fully fitted with wooden back boards for electrical use.

Ornamental Signposts

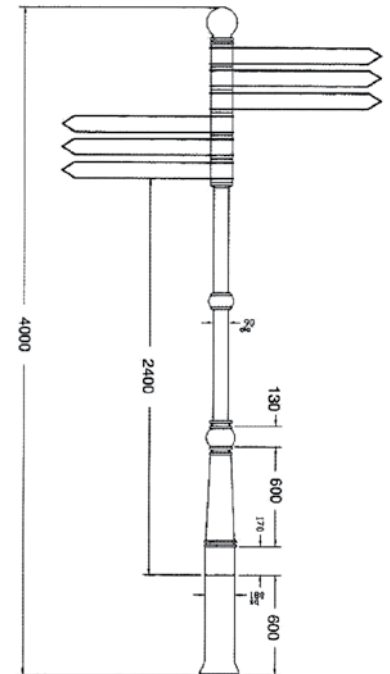

Classic, Victorian fingerposts and signs are unarguably one of the most common and cherished testaments to cast iron still found in both cities and the countryside today. Unlike most suppliers of these items we produce a number of these each year in the UK for both commercial and domestic customers ensuring we use the highest quality products to faithfully re-create the beautiful signage of the 18th Century.

Purchasing Guide

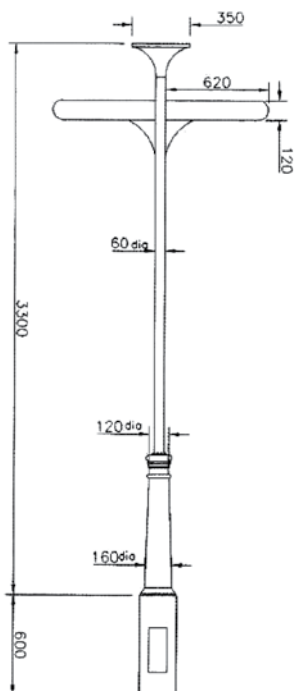

- We have a range of finials to complete each column – these are wholly interchangeable.
- Individual finger arms can be ordered on demand to replace old, damaged ones.
- Arms come in singles, doubles and triples.
- The maximum amount of lettering per sign is 22 individual letters.
- Arms can be double sided for lettering.
- Painting is available in a number of options. Please call our technical sales team with any query you may have.
- All items are provided individually for site erection. Each arm and the finial are supplied with grub screws to be tightened and set in the right direction on site.

Cast Iron Seat Ends and Benches

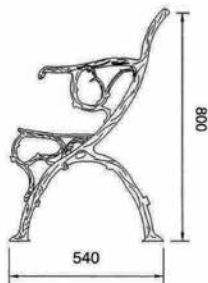

We are proud to produce a stunning selection of outdoor benches for parks and gardens in traditional and contemporary designs. Cast irons seating is not only beautiful but also extremely durable. We can offer supply only service on bench ends and do not do the fitting of the wooden or steel slats. We would recommend only using FSC certified hardwood in all of our benches. If you cannot find what you require in our catalogue we are constantly making new designs so are happy to look at any enquiry.

Purchasing Guide

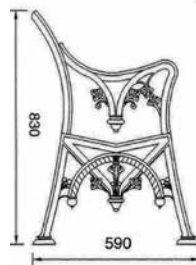

- All benches are fixed above ground using anchor bolts. Bolts can be supplied at an extra cost.
- We can produce these items in both cast and ductile iron. In an area where there is a possibility of vehicular or mechanical impact, or a high chance of vandalism, we would highly recommend using ductile irons.
- Final painting and powder-coating is available on these products.

Cast Iron Bollards

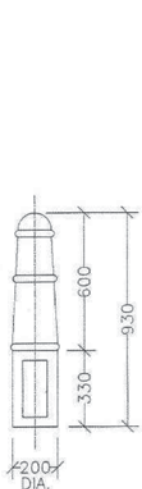

Our bollards are all produced in our foundry using traditional methods. We have a broad range of bollards that can be adapted for a number of different uses from chain barriers to cycle stands. Our bollards are all produced in the UK using traditional foundry methods and we have a design to suit any occasion. If you cannot find something to suit in this catalogue we are constantly adding to our designs through partnerships with councils, architects and private individuals to create truly bespoke products.

Purchasing Guide

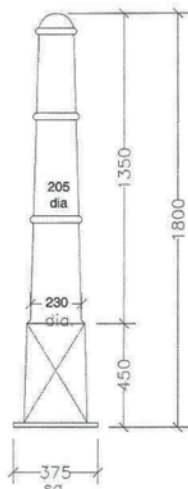

- Insignias, lettering and coats of arms can be added to any bollard.
- Eye bolts can be added to allow for chain links.
- We can produce these items in both cast and ductile iron. In an area where there is a possibility of vehicular or mechanical impact, or a high chance of vandalism, we would highly recommend using ductile irons.
- Some bollards are available in removable options.
- Final painting and powder-coating is available on these products.
- Reflective bands can be applied. Colours are available on request.
